DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE

527 N. Howard Street is a three bay wide, two and one half story high building with a pitched roof punctuated by two symmetrically arranged dormers each containing one half arched double hung window of six over six lights. The entire building wall was probably at one time brick. However, the first story facade has been altered to accomodate a tiled surfacing material and, to the left, a flat double plate glass door with aluminum frames surmounting a stone stoop. The door is surmounted by a flat plate glass transom. To the right of the door is a large flat plate glass window with aluminum framing and divided into three lights with the center light being the largest. This door and window arrangement is surmounted by an applied aluminum cornice. The second story facade is of painted brick and punctuated by three symmetrically arranged flat double hung windows with one over one lights, wood sills, and brick lintels. A modest cornice delineated the roofline.
